Re: Mendel move supported (SP, Feb. 16).

I just wonder what the response would have been like if poll takers were included the question as to whether the renovation of the existing Mendel Art Gallery would be a positive step for Saskatoon?

I suspect we would have seen a similar positive response - perhaps even greater.

I am actually a little insulted at the question that was asked because it doesn't really prove anything except how poll questions can be composed to give the answer you want.
